TO THE HOSPITAL OR ATTENDING PHYSICIAN: The law requires that the death certificate be executed within 24 hours after death. Page 6 may be retained by the hospital or attending physician.

TO THE FUNERAL DIRECTOR: After this certificate has been signed by the attending physician and completely filled in by the funeral director, page 5 should be detached for use as the burial-transit permit. Pages 1, 2, 3 should be filed within 72 hours after death with the State Dept. of Health and Mental Hygiene prior to burial, cremation, or removal.

1. The first part of the report is a general description of the project. It includes the title, the objectives, and the scope of the work. The title is "A Study of the Effect of Temperature on the Rate of Reaction of Hydrogen Peroxide with Potassium Iodide". The objectives are to determine the effect of temperature on the rate of reaction and to determine the activation energy of the reaction. The scope of the work is limited to the reaction of hydrogen peroxide with potassium iodide in aqueous solution.

2. The second part of the report is a description of the experimental procedure. It includes the materials used, the apparatus, and the method of carrying out the experiment. The materials used are hydrogen peroxide, potassium iodide, and distilled water. The apparatus consists of a reaction flask, a thermometer, and a stopper. The method of carrying out the experiment is to mix a known volume of hydrogen peroxide with a known volume of potassium iodide in the reaction flask and to measure the time taken for the reaction to occur.

3. The third part of the report is a description of the results of the experiment. It includes a table of the data obtained and a graph of the rate of reaction versus temperature. The data obtained are as follows:

Temperature (°C)	Time taken for reaction to occur (s)
10	120
20	60
30	30
40	15
50	8

The graph of the rate of reaction versus temperature shows that the rate of reaction increases with increasing temperature. The activation energy of the reaction is determined to be 50 kJ/mol.

4. The fourth part of the report is a discussion of the results. It includes a comparison of the results with those obtained by other workers and a discussion of the factors which affect the rate of reaction. The results obtained in this experiment are in good agreement with those obtained by other workers. The factors which affect the rate of reaction are temperature, concentration, and the presence of a catalyst.

5. The fifth part of the report is a conclusion. It states that the rate of reaction increases with increasing temperature and that the activation energy of the reaction is 50 kJ/mol.

TO THE HOSPITAL OR ATTENDING PHYSICIAN: The law requires that the death certificate be executed within 24 hours after death. Page 6 may be retained by the hospital or attending physician. TO THE FUNERAL DIRECTOR: After this certificate has been signed by the attending physician and completely filled in by the funeral director, page 5 should be detached for use as the burial-transit permit. Pages 1, 2, 3 should be filed within 72 hours after death with the State Dept. of Health and Mental Hygiene prior to burial, cremation, or removal. IMPORTANT: If item 28 is marked, or item 23 shows any injury, or other traumatic event, the medical examiner must be notified at once.
